3162.3-2 (07327)

Pamela W. Staley  
Amoco Production Company/  
P.O. Box 800 1670 Broadway  
Denver, Colorado 80201

Dear Ms. Staley:

We have reviewed your application to commingle production downhole from the Blanco Mesaverde and the Basin Dakota Pools in the following well:

**Jones Com #4**  
**1580' FSL, 1250' FWL, Section 30, T-29N, R-8W**  
**San Juan County, New Mexico**

Mesaverde production will be communitized and report to CA # 14080013521. Dakota production is communitized and reports to CA # SRM 1535. The Dakota formation has been productive since April 1981 and has a well established decline rate. Production from offset Mesaverde wells is declining at similar rates, however, there will be a period of flush production from the Mesaverde formation when it is completed in Jones Com #4. To accurately allocate commingled production, Dakota production must be extrapolated and remaining production allocated to the Mesaverde until both formations are declining at the same rate. When this occurs, allocation can be converted to percentages. Please notify this office when allocation factors are changed. Your Application to commingle is hereby approved using the above formula to allocate production.

Under provisions of 43 CFR 3165.3, you may request an Administrative Review of the order(s) described above. Such request, including all supporting documents, must be filed in writing within 20 business days of receipt of this notice and must be filed with the State Director, Bureau of Land Management, P. O. Box 27115, Santa Fe, New Mexico 87502-0115. Such request shall not result in a suspension of the order(s) unless the reviewing official so determines. Procedures governing appeals from instructions, orders or decisions are contained in 43 CFR 3165.4 and 43 CFR 4.400 *et seq.*

If you have any questions regarding this correspondence, please contact Ray Hager at (505) 599-6366.

Sincerely,  
/s/ Duane Spencer
