NATURE OF RELEASE

Type of Release: Produced Water	Volume of Release 50bbls	Volume Recovered 0
Source of Release: 2" poly line connected to a water transfer pump	Date and Hour of Occurrence 4/19/11 time unknown	Date and Hour of Discovery: 04/19/11 at 7:29 PM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.* NA		
Describe Cause of Problem and Remedial Action Taken.* A 2" poly line failed where it was connected to a water transfer pump. The pump was shut down causing the flow of water to stop. The poly line was repaired later that evening.		
Describe Area Affected and Cleanup Action Taken.* The produced water traveled down a lease road for approximately 900 ft and approximately 1200 ft. down an arroyo. The BLM agreed to wash the road and arroyo down with fresh water and capture the excess using a vacuum truck. On 04/25/11 approximately 300 bbls of fresh water was used to rinse the leak area. The area immediately south of the source that was not included in the wash activities, was delineated. Soil samples were field screened and submitted to a commercial lab for confirmation. Based on sample results, the impacted areas not previously washed were excavated and a liner was installed in the area of highest chloride concentration. The excavations were backfilled with clean, imported soil and leveled.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
