Describe Cause of Problem and Remedial Action Taken.*

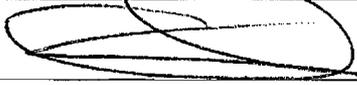

Internal corrosion caused a hole to form 6 inches from the bottom of the tank on the East side. This caused 86 bbls of oil to leak onto the ground. A vacuum truck recovered 50 bbls of oil and the tank was repaired.

Describe Area Affected and Cleanup Action Taken.*

The affected area is approximately 100' x 20' on location. Remediation will be completed in accordance with a remediation plan approved by NMOC.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
