Subject: Undesirable Event: NU12027TG, Fren Oil Co 23: Archeological Clearance; spill map attached
Attachments: Fren Oil Co 23-102711 spill map-110111.jpg

Gentlemen,

This notification is in regard to the following location and undesirable event:

Event Number: NU12027TG
Event Date: 10/27/2011
Event Name: Fren Oil Co 23
Legals: T17S/R31E, sec. 19, SWSE

This spill site falls within previously archeologically surveyed space. No archeological survey or monitor is required. The operator is approved to proceed with delineation and cleanup operations. (A verbal approval was given to contractor to proceed at the time of the first onsite assessment on 11/16/11.)

It should be noted that the western portion of the spill runs atop an old reserve pit area that has pit plastic and pit contents showing on the surface, as well as erosion and lack of vegetation. Even though the spill is atop the reserve pit, it still must be mitigated and addressed. In addition, the reserve pit needs to be stabilized in such a manner that vegetative growth can be established.

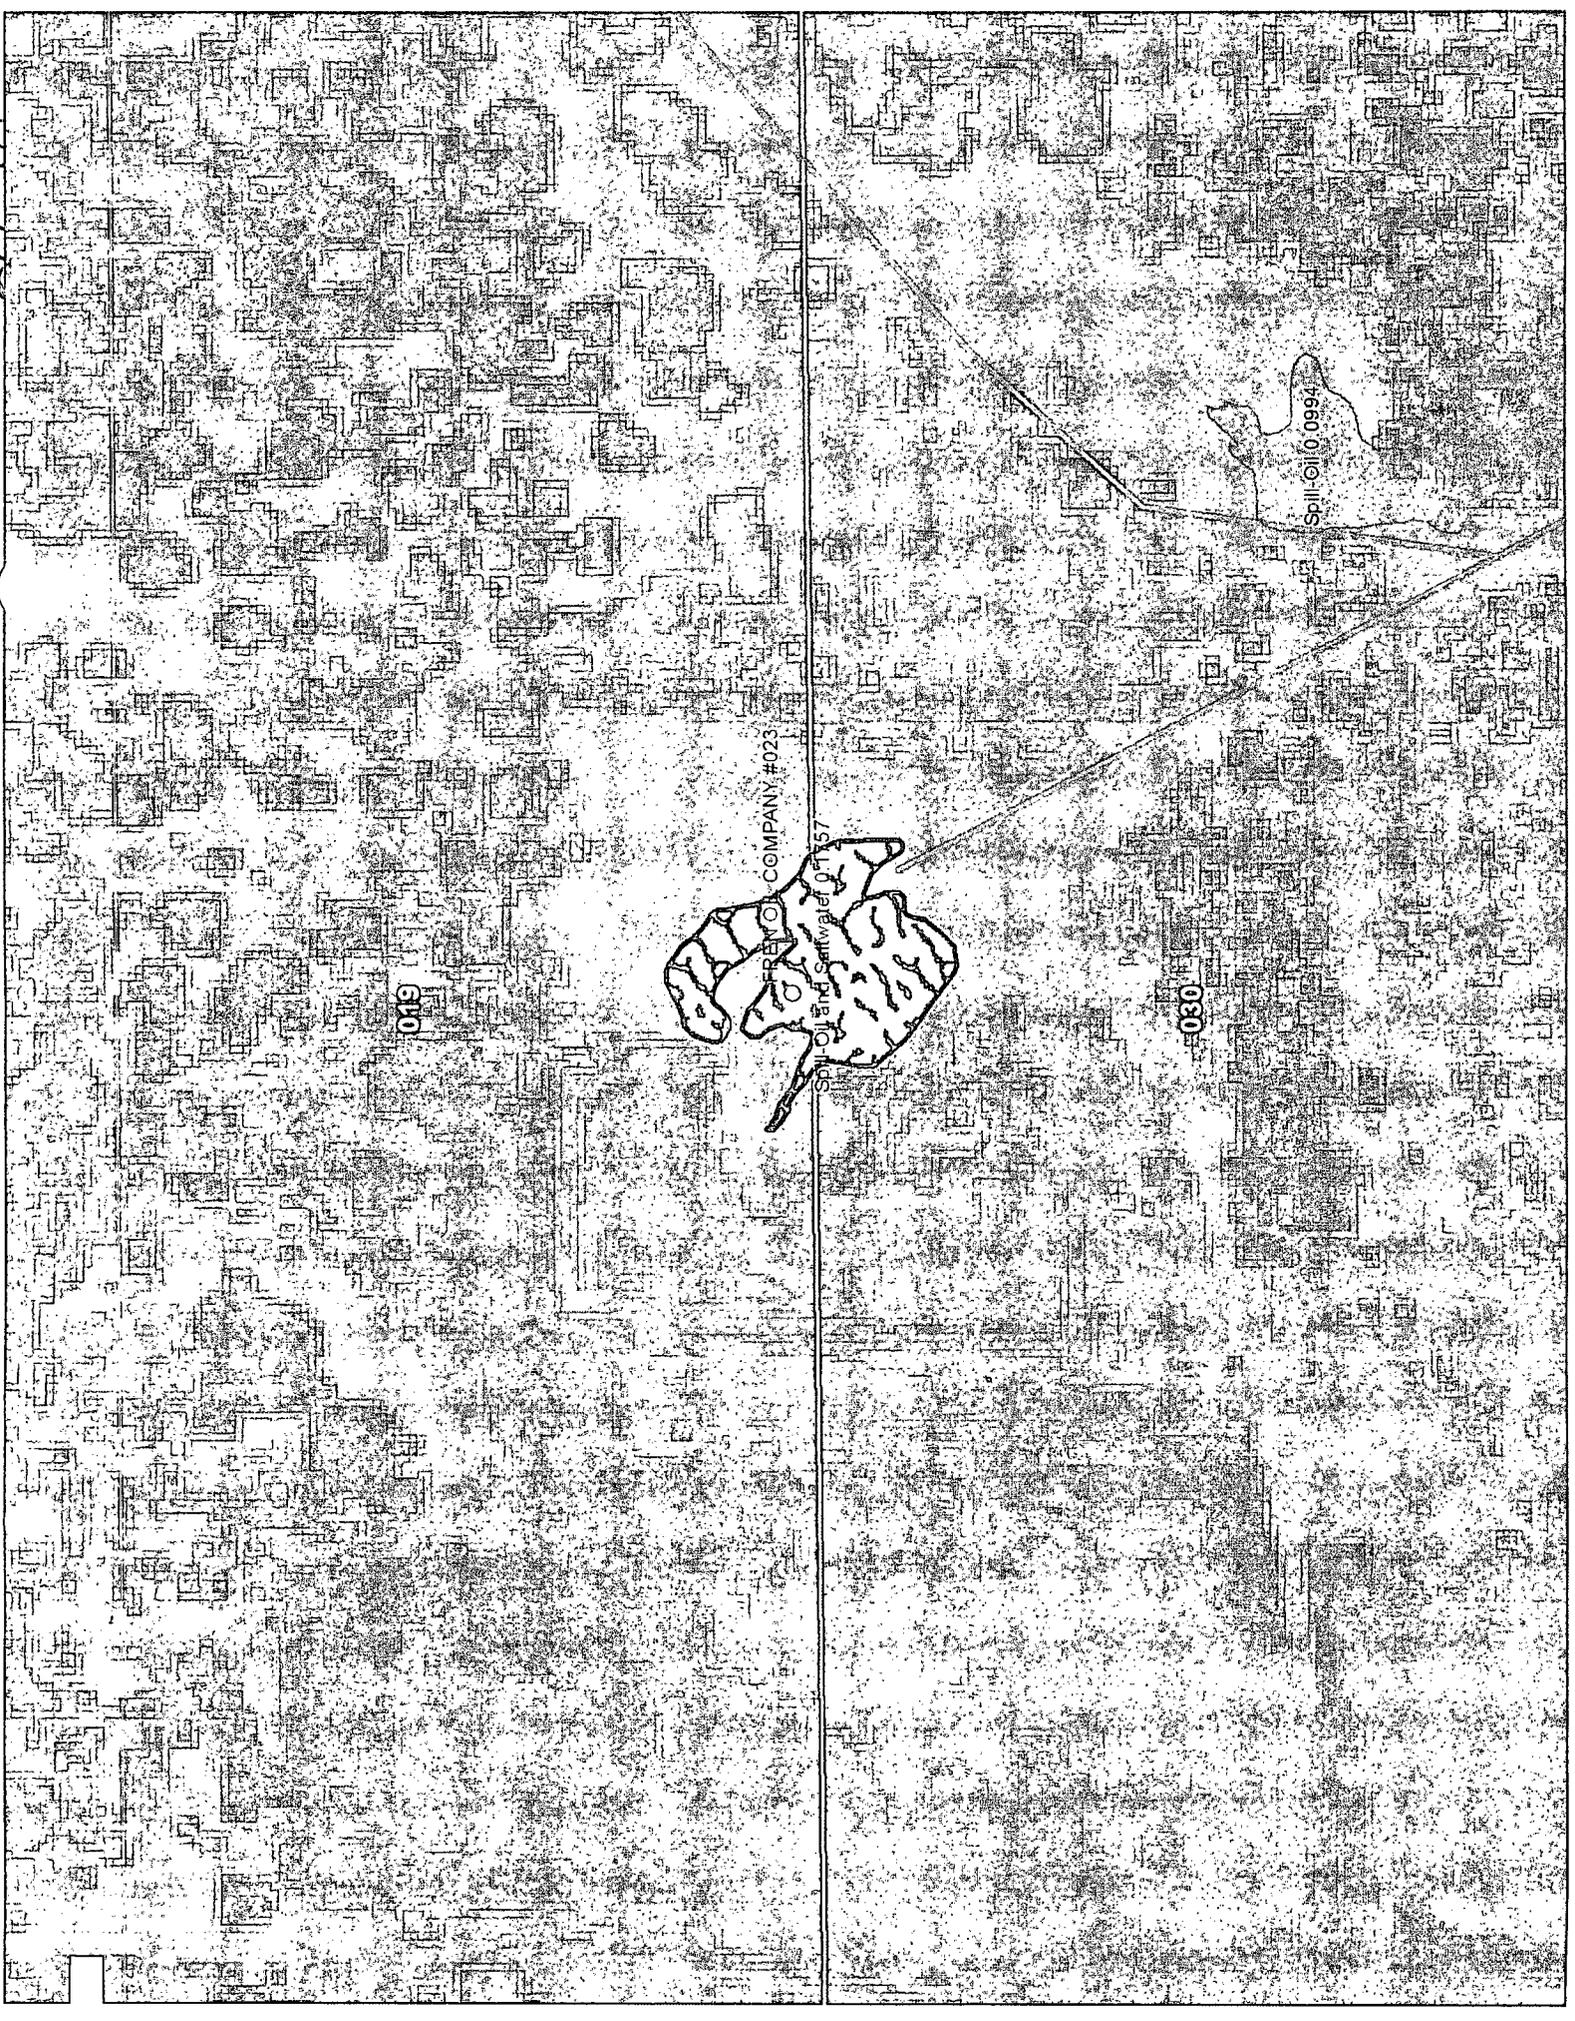

Spill map attached.

Thank you for your attention to these matters,

Terry Gregston
