Amber,

I am OK with closing this out. It was a relatively large net fluid volume loss, but I think BLM is set up to track these type releases to site closure.

Mike,

On 2/7/2014 I received a phone call from Duncan about this release/workplan. He told me he visited the site and that there is nothing left for Yates to do concerning the release. He asked that we weld the liner back together and close this one out. It was mentioned that if any issues arise at time of abandonment due to this release, we would take care of them then. If you are okay with Yates welding the liner back together, we will proceed with it and then submit a Final C-141. Please let me know.

Thanks,  
Amber

Mike/Jim/Duncan,

Please find attached a work plan for a release that occurred at the Punch BJD Federal #1 on October 31, 2013.

Please call or email me with any questions.

Once I receive approval from both NMOCD and BLM, Yates will start work on clean-up.

Thanks,
