If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* The produced water tank overflowed due to a pump malfunction. The main water transfer pump failed to come on. The pump motor was replaced.

Describe Area Affected and Cleanup Action Taken.\* The released fluid affected an area of approximately 3,000 sq. ft inside the earthen containment around the tanks. The facility did not have impervious containment at the time. The free-standing fluids were removed with a vacuum truck. Following initial response activities, the release was remediated as per NMOCD guidelines. Please reference the attached *Remediation Summary & Risk-Based Site Closure Request* for details of remediation activities and laboratory analytical results from confirmation soil samples.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
