Hi David,

It looks like this work plan is overall good.

One Stipulation:

The test data you gave me shows that we are not definitive below 1000 ppm on chlorides until we reach a depth of 3bgs at S-3, S-4, S-5, and S-6. So, I will need confirmation samples at the 2.5ft depth after the excavation is complete. Other than that you are good to go.

Bests,  
Sol

Gentlemen,

Attached please find our proposed work plan for the above referenced Cimarex location. I've attached a site plan, water table information, the initial C-141 and the lab data for your use. Please review at your earliest convenience. Let us know if it's ok to proceed or you have any stipulations you'd like us to be aware of. Thank you in advance for your time in this matter.

Respectfully,
