Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* The needle valve came out of the pipe which is connected to the charge pump. This caused 65 barrels of produced water to be released. 60 barrels in the containment and 5 bbls outside of the containment. The well was shut off. A vacuum truck was immediately called for vacuum services. 65 barrels of produced water was recovered. The pump was repaired. The area affected was within the berm approximately 30 feet wide by 60 feet long. The affected area outside the containment was approximately 5 feet wide by 75 feet long. Talon LPE was immediately contacted for the correction of this release.

Describe Area Affected and Cleanup Action Taken.\* 5/30/14 at 2:02 pm an emergency OneCall – ticket # 2014-22-3070, which cleared the same day by email and telephone conversation with Sheldon Hitchcock and in person on location. Sheldon Hitchcock met Devon representatives Kenny Kidd, Matt Nettles, and Brian, Devon's line locator. On 6/2/14 Talon personnel and roustabouts began hand excavating around all lines. The impacted area was hand excavated to the depth of 1.5-feet deep. Confirmation soil sampling was completed on 6/4/2014 and delivered to Cardinal Labs. The lab results are attached along with a site map and groundwater data for the area. The soil testing results are under the Recommended Remedial Action Levels (RRAL) after initial excavation. The excavated area was backfilled back to grade using new material transported from a local borrow pit. No further actions are required.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
