If a Watercourse was Impacted, Describe Fully.*

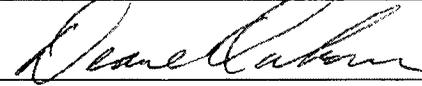

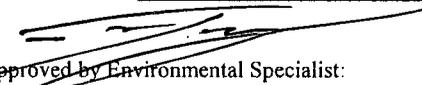

Describe Cause of Problem and Remedial Action Taken.*

Derrickhand left his post at the shaker unattended. When sweep came around, shaker blinded off with no one to keep them clean, fluid over flowed shaker and went onto roll off bin and ground. Total of 40 bbls lost according to electronic data recorder and some of that went into roll off bin, so less than 40 bbls of drilling fluid spilled on ground.

Describe Area Affected and Cleanup Action Taken.*

In and around roll off bin, vacuum truck will pick up any fluid possible and remainder of wet location will be remediated as needed.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
