Application for surface commingling, Bone Spring Pool, Eddy County, NM (T24S-R29E, Sec 33 & 34)

Dear Sirs,

Chevron North America respectfully requests administrative approval to surface commingle oil, gas, and water production from the Bone Spring Pool through Chevron's Rustler Bluff Central Battery. Chevron request the approval to minimize surface disturbance and future traffic by concentrating activities at one battery. Wells producing to this battery include the Chevron Rustler Bluff 33 24 29 Fed Com #1H; Rustler Bluff 34 24 29 Fed Com #2H. All wells will be completed within the Second Bone Spring sand Formation, per attached map. These wells are located in section 33 & 34, T24S-R29E, Eddy County, New Mexico. APDs for each well, which includes surface plats, are included with this notification.

The working interest and royalties are the same for all two leases involved in this request (100% CVXI). These wells will be horizontally drilled in fall of 2014. As such, the wells will be allocated by monthly Well test with coriolis on oil and EFM on gas. A schematic showing this configuration is attached.

Sincerely,

A handwritten signature in black ink that reads "Cindy Herrera-Murillo". The signature is written in a cursive, flowing style.

APPLICATION FOR, COMMINGLING and OFF LEASE MEASUREMENT AT A COMMON CENTRAL TANK BATTERY

Proposal for Rustler Bluff 33-24-29 1H and Rustler Bluff 34-24-29 2H:
 Chevron USA Inc is requesting approval for the Central Tank Battery, Commingling, and Off lease sales of gas and oil:

Federal Lease NMNM120893, NMNM118713				Oil			
Well Name	Location	API #	Pool 96217	BOPD	Gravities	MCFPD	BTU
Rustler Bluff 33 Fed #1H	Sec4, W2E2 T24SR29E	3001542670	Willow Lake; Bone Spring	465	51	1450	1283

Federal Lease NMNM120894, NMNM118714				Oil			
Well Name	Location	API #	Pool 96217	BOPD	Gravities	MCFPD	BTU
Rustler Bluff 34 Fed #2H	Sec3, W2E2 T25SR29E	3001542671	Willow Lake; Bone Spring	465	51	1450	1283

The BLM's interest in these leases is the same. Lease NMNM120893 royalty rate is 12.5%, Lease NMNM118713 royalty rate is 12.5%, Lease NMNM120894 royalty rate is 12.5 %, and Lease NMNM118714 royalty rate is 12.5%.

Oil & Gas metering:

The central tank battery will be located at the Rustler Bluff 34 Federal Section 3. There are three oil tanks at the central tank battery that the wells will utilize and oil will be sold through the central delivery point (CDP) Lease Automated Custody Transfer unit (S/N *), which is located in the NENE, Sect 3 T24S, R29E. For gas they will have a common central delivery point (CDP) gas sales meter (S/N *) which is located in the NENE, Sec. 3 T24S, R29E. The produced water will go to a common water tank on location.

Each well will be continuously tested through discrete three –phase test separator located at central tank battery. Each three phase test will measure oil through a coriolis meter on the oil outlet line and gas through an orifice meter run with a Total Flow computer.

Each well's share of the central tank battery's total production will be calculated based on the results of the continuous well test. This ratio will be applied to the total oil production metered by the Lease Automated Custody Transfer (LACT) meter located at the Rustler Bluff 34 central tank battery. The production will also be applied to the total gas production metered by the Targa Resources Corp sales meter.

Rustler Bluff 33 24 29 #1H oil allocation meter on the Rustler Bluff 34 central tank battery three-phase test separator consists of a Micro Motion Coriolis meter (S/N *).

Rustler Bluff 34 24 29 #2H oil allocation meter on the Rustler Bluff 34 central tank battery three-phase test separator consists of a Micro Motion Coriolis meter (S/N *).

These meters will be proven as per API, NMOCD, and BLM specifications when installed, once per month for the first 3 months (to establish a consistent repeatability factor), and then quarterly thereafter. The factor obtained will be used to allocate the production volumes.

Gas production will be allocated on a daily basis based on the results of the continuous well test of each well.

Rustler Bluff 33 24 29 Federal #1H gas allocation meter on the Rustler Bluff 34 central tank battery three-phase test separator consists of a Tele Flow EFM (S/N *).

Rustler Bluff 34 24 29 Federal #2H gas allocation meter on the Rustler Bluff 34 central tank battery three-phase test separator consists of a Tele Flow EFM (S/N *).

All metering serial numbers (S/N *) will be provided prior to production from these wells.

These meters will be calibrated on a regular basis per API, NMOCD and BLM specifications. The BLM and OCD will be notified of any future changes in the facilities.

Process and Flow Descriptions:

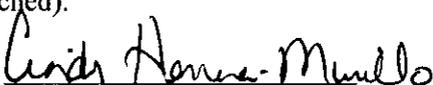

The flow of production is shown in detail on the enclosed facility diagram and map which shows the lease boundaries, location of wells, location of flow lines, facility, and gas sales meter. The commingling of this production is the most effective economical means of producing the reserves and will not result in reduced royalty or improper measurement of production. The proposed commingling will reduce operating expenses as well as reduce the surface facility footprint and overall emissions.

Chevron USA Inc understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

The production from the two wells will be routed to the Rustler Bluff Federal 34 central tank battery located in Sec. 3 W2E2, T24S-R29E, on federal lease NMNM118714 in Eddy County, New Mexico. After separation and allocation measurement, the oil, gas, and water will go to common oil tanks, water tank, and gas CDP located in Section 3.

Rustler Bluff 33 24 29 #1H and Rustler Bluff 34 24 29 #2H will require off lease measurement, storage and sales of oil and gas.

Working, royalty, and overriding interest owners have been notified of this proposal via certified mail (see attached).

Chevron has a master sales agreement in place for all the Bone Spring wells in the area. All Bone Spring oil production in the area is sweet. Part of this agreement is that oil is deemed as sweet and sold at a flat rate of 51 API gravity. Therefore, regardless of the API values of the individual wells, the common stream will be sold as if it was sweet and 51 API gravity.

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Chevron USA Inc. respectfully requests administrative approval to surface commingle oil, gas, and water production from the Bone Spring Pool through Chevron's Rustler Bluff Central Battery. Chevron request the approval to minimize surface disturbance and future traffic by concentrating activities at one battery. Wells producing to this battery include the Chevron Rustler Bluff 33 24 29 Fed Com #1H; Rustler Bluff 34 24 29 Fed Com #2H (which will be horizontally drilled in fall of 2014 into the Second Bone Spring sand Formation, per attached map). These wells are located in section 33 & 34, T24S-R29E, Eddy County, New Mexico. API's Included:

Rustler Bluff 33 24 29 Fed Com #1H API# 30-025-42670 Lease # NMNM120893
Rustler Bluff 34 24 29 Fed Com #2H API# 30-025-42671 Lease # NMNM120894

Please find attached surface commingle application for the above wells and facility diagrams and maps.
