**NATURE OF RELEASE**

Type of Release	18 BBLs Prod Wtr/4 BBLs Skim Oil	Volume of Release	22 BBLs	Volume Recovered	16 BBLs Prod Wtr/3 BBLs Skim Oil
Source of Release	Holding Tanks	Date and Hour of Occurrence	Sunday, 10/19/2014, 4:00 PM	Date and Hour of Discovery	Sunday, 10/19/2014, 4:00 PM
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

The Electrical Contactors for the West Transfer Pump fused together resulting in the High Level Alarms not shutting the pump off. Called to location, pulled main power panel to West Transfer Pump, pump was shut down. No remedial action taken due to double 40 mil liner in containment area.

Describe Area Affected and Cleanup Action Taken.\*

The South/East Area of the Containment Facility was flooded with 400 BBLs of Fresh Water, so that Fresh Water would move from South/East to North/West Sump Pump and carry all Hydro-Carbons to the Sump Pump. The Sump Pump, pumped all Recoverable Spillage back into the Holding Tanks. A Roustabout Crew moved gravel and created channels in existing 'graveled' Containment Area, so that channels would carry flood water back to Sump Pump. Also a Vacuum Truck was utilized to pick up any additional spillage, which was then put back into the Holding Tank. The 'Spillage-Area' was washed down with a Micro-Blaze Fresh Water Mix for final clean-up of any additional Hydro-Carbons that may not have been recovered in the 'graveled' Containment Area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
