Re:

DHC Application

Grizzell B #6 API#30-025-38825

Dear Mr. McMillan:

The Pools to be comingled in the Grizzell B#6 well are the Blinebry (6660), the Tubb (60240), Drinkard (19190) and the Wantz; Abo (62700). The comingling of the pools will not reduce the value of total remaining production.

The production percentages were calculated based on the last 24 hrs production test from the Tubb/Drinkard/Wants; Abo before the workover and a 24 hr production test from the Blinebry after the workover. Those tests were then divided by the combined tests to get a percentage for the Blinebry. The remaining percentage was then divided among 3 remaining pools based on their percentages as noted in DHC-HOB-0291. This was done for oil, gas and water.

Ownership between all pools is different, notification letters will be sent out to all interest owners.

Respectfully,

Randall Hicks
Sr. Operations Engineer
Vanguard Natural Resources

Grizzell B #6 API # 30-025-38825

RE: DHC-4688 New Mexico M State Well No. 55 DHC-4689 Vanguard Permian, LLC

Cole State Well No. 8 and DHC-3780-A Vanguard Permian, LLC Cole State Well No. 23

I had difficulty putting 4 zones on the form with 3 columns so it may be confusing. The Tubb / Drinkard is under the oil at 7%/13%. The gas is 7%/15% for Tubb/Drinkard.

For Oil

67+7+13+13= 100

Blinebry+Tubb+Drinkard+Abo

For gas

74+7+15+4 = 100

Blinebry+Tubb+Drinkard+Abo

Let me know if this clears it up.

Thanks,

Randall Hicks

Randall:

Your percentages for oil do not equal 100%, I get 94%. The gas production is 106%. Can you recheck the numbers.

Thank You

Michael McMillan
