fluids contained within unlined berm. Talon was called to assess and develop spill plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: Vega 9 Federal Battery Fire - 11/18/2014

Mike/Heather,

At approximately 9 PM (MST) yesterday evening a fire occurred at the Vega 9 Federal Battery. The Loco Hills & River Side Fire department were called out to location to put the fire out and did so safely. As of right now we know that 2 heater tréaters and 2 separators were damaged during the fire and a unknown amount of fluid was released. The foreman over this area will investigate the incident at sun rise and update.
