Re: San Juan 28-5 Unit #72P NSL application for Basin Dakota and Blanco Mesaverde Pools
Unit N (SESW), 564' FSL & 2378' FWL, Sec. 35, T28N, R5W
API - 30-039-31241

Dear Sir:

This is a request for administrative approval for a non-standard gas well location in the Basin Dakota and Blanco Mesaverde Pools.

The proposed San Juan 28-5 Unit 72P was staked as a commingled MV/DK well. The placement of the well is non-standard for the Basin Dakota per Order R-10987B (2) and Blanco Mesaverde per Order R-01987-A (1). The placement of the well is less than 660' from section line which is also the Unit boundary line between San Juan 28-5 Unit and San Juan 27-5 Unit and as such it is considered to be non-standard for both the Mesaverde and the Dakota pools per the Orders.

The San Juan 28-5 Unit 72P's surface location was selected due to existing topography. There wasn't a viable location other than the one it is currently staked because of large drainage arroyos on the north and west sides of the location. There is also a cultural sensitive area to the east that prevented us staking the well closer to existing access road. Production from the Basin Dakota and Blanco Mesaverde are included in the following gas spacing unit:

✓ ✓ ✓
Dakota: 345.82 acres - Sec 35: lots 3 and 4, NE/4 NW/4, S/2 NW/4 and N2 SW/4; Sec. 34: Lot 1
Mesaverde: 361.36 S/2 of Section 35. NSP approval for this section is Order 2948 (13).

To comply with the New Mexico Oil Conservation Division rules, we are submitting the following to help with your decision process:

1. Approved APD cover page and its C102 plat
2. 9 Section Plat showing wells in the area
3. Topo & aerial maps showing the location of the well

Burlington Resources Oil & Gas, LP is the offset operator and notification has been provided to the WI owners of the affected units indicated above. Please let me know if you have any questions about this application by calling me at 505-326-9518.

Respectfully,

APPLICATION OF EL PASO NATURAL GAS
COMPANY FOR NON-STANDARD GAS PRORA-
TION UNITS, BASIN-DAKOTA GAS POOL,

ORDER OF THE COMMISSION

BY THE COMMISSION:

NOW, on this 16th day of August, 1965, the Commission, a quorum being present, having considered the testimony, the record, and the recommendations of the Examiner, and being fully advised in the premises,

FINDS:

(1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.

(3) That a standard gas proration unit in the Basin-Dakota Gas Pool consists of 320 acres, and that each of the proposed non-standard units exceeds 320 acres.

(4) That non-standard units are necessary in the subject area due to variations in legal subdivisions of the U. S. Public Land Survey.

(5) That the non-standard units created in the subject area should approximate 320 acres, insofar as is practicable, in order to afford to the owner of each property in the Basin-Dakota Gas Pool the opportunity to produce his just and equitable share of the gas in the pool, and otherwise prevent waste and protect correlative rights.

(6) That non-standard gas proration units approximating 320 acres, insofar as is practicable, should be created in the subject area, and that the subject application should otherwise be denied.

Subject: RE: San Juan 28-5 Unit #72-P

Hi Mike,

I checked this again and found that the DK is dedicated to the N/2 and the MV is dedicated to the E/2 in Section 2, T27N, R5W. But notification was given to all of the interest owners of Section 2, T27N, R5W because Section 2, T27N, R5W is in a Participating Area for both MV and DK so our notification requirements should have been met.

Ms. Clugston:

The spacing unit for the Basin Dakota and Blanco-Mesaverde in Section 2 T27N, R5W is the N/2. Is this correct?

Thank You
