|--|--|

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*
The 2" valve leading from the 1440# separator to the water tanks was closed causing the vent tank to run over. The valve was immediately open upon discovery of the release to prevent further release.

Describe Area Affected and Cleanup Action Taken.*
6 of the 8 released BBLS of oil were contained within the lined secondary containment. 2 of the 8 BBLS of released oil overflowed from the secondary containment onto the well pad on the north side of the vent tank. The size of the affected area was approximately 15'x15'. A vacuum truck recovered all 8 BBLS of oil spilled.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Mr. Bratcher,

Please find the attached C-141, GIS image, & pictures of the spill for the Laguna Salado South 1. This C-141 was sent inadvertently to the BLM only on 1-26-15. We deeply apologize for this oversight and will make sure that it does not happen again.

Thank you,

Jacqui Harris
