Describe Cause of Problem and Remedial Action Taken.*

Legend Energy Services pumped 1700 bbls of water down the hole at the Rigel Fed Com 5H and the gate valve was left open which caused the Rigel 20 Fed Com 1H battery to swamp the 2 phase separator and heater, causing water and oil to flow into tank #1 at a high rate. 30 bbls of oil was spilled into containment and 30 bbls of oil was recovered. Valve was closed to stop the over flow.

Describe Area Affected and Cleanup Action Taken.*

The oil spill was in containment, it was 30 bbls and 30 bbls was recovered.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
