If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
Injection line ruptured and released fluids onto pasture land.

Describe Area Affected and Cleanup Action Taken.\*  
The leak affected 4,328 square feet of pasture. The impacted soils were scraped to 3' below ground surface and removed to a NMOCD approved disposal facility. Representative soil samples of the excavation bottom were submitted for laboratory confirmation. The excavation was backfilled with clean imported soil similar to that of the native terrain, and the site was contoured to the surrounding landscape with erosion controls. The site will be seeded with BLM seed mix #2 and #4.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
