**NATURE OF RELEASE**

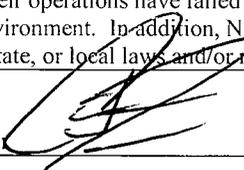

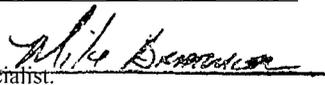

Type of Release: Crude Oil	Volume of Release: 20 bbl	Volume Recovered: 0 bbl
Source of Release: Flowline rupture	Date and Hour of Occurrence	Date and Hour of Discovery
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
The Delaware Basin Midstream, LLC low pressure system flowline to the low pressure separator at the State Line Compressor Station, located in Reeves County, TX, back-pressured, causing a rupture in the line, releasing approximately 20 bbl of oil onto ground surface.

Describe Area Affected and Cleanup Action Taken.\*  
Ruptured flowline was immediately repaired and crude oil impacted soil will be properly remediated in accordance with New Mexico OCD regulations.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
