Describe Cause of Problem and Remedial Action Taken.\*

A transfer pump and injection pump could not keep up with production causing the tanks to run over resulting in a 15bbl spill of produced water within the lined containment.

Describe Area Affected and Cleanup Action Taken.\*

A vacuum company was called out and they vacuumed up 15 BBL of produced water. Confirmed lining in containment was secure and no holes were found.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
