OCD Tracking Number: 2RP-1514 \* Date of release: 1/9/2013

Mike,

Your proposal for remediation of the above referenced produced fluid release is approved. OCD requests the target excavation depth for the area identified as BH-1 to be 6' (feet) bgs, or as close to that depth as is practicable. It is OCD's understanding that remedial operations are underway at this site.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
