Re: Application of Matador Production Company for administrative approval of an unorthodox well location for its Hibiscus State 08-19S-35E RN #124H Well (API 30-025-42502) located in the E/2N/2 of Section 8, Township 19S, Range 35 East, N.M.P.M., Lea County, New Mexico.

Dear Mr. Catanach:

Matador Production Company (OGRID No. 228937) seeks administrative approval of an unorthodox well location for its **Hibiscus State 08-19S-35E RN #124H Well (API 30-025-42502)** to be completed within the Scharb; Bone Springs Pool (Pool Code 55610) underlying Section 8, Township 19S, Range, 35E, Lea County, New Mexico. Attached as **Exhibit A** is a C-102 for the well. This well is a horizontal well that will be drilled as follows:

- **Surface Hole Location:** 200 feet from the South line and 352 feet from the East line of Section 5 (Unit P);
- **First Perforation Point:** 330 feet from the North line and 350 feet from the East line of Section 8 (Unit A);
- **Last Perforation Point:** 330 feet from the South line and 350 feet from the East line of Section 8 (Unit P); and
- **Bottom Hole Location:** 260 feet from the South line and 350 feet from the East line of Section 8.

Matador Production Company is requesting this NSL in order to efficiently produce its interests in Section 8. The Special Pool Rules, governed by Division Order R-2589, as amended, for the Scharb-Bone Spring Pool require 80-acre spacing units and wells to be located more than 460 feet from the section line. As a result, the completed interval for this well encroaches on

Hi Mr. McMillian~ We tested each zone independently. We perf'd and tested Mississippian for several days then set several CIBPs w/ cmt on top and perf'd the Atoka testing it independently as well for several weeks. We drilled out CIBPs after production rates were established. This was not based on production logs.

Thank you

Can you tell me how you arrived at the percentages?
Did you test the zones? Was it based on well logs?
This is the last thing I need to recommend signature.
