Mike,

As per our conversation yesterday, I have instructed Elke Environmental to remove 150 yards of contaminated material, bring this much of clean material in, then blend to achieve the levels necessary for the ranking criteria at this site. (< 1000 ppm TPH).

Thanks,

**Kelton Beaird**

Mike,

As per our conversation today (4-20-09), attached is the workplan changes to match our discussion. The changes are to not install the Geotextile Liner, poly liner and pea gravel. If the impacted soil cannot be onsite remediated it will be hauled to Lea Land Disposal instead of CRI Disposal. The original workplan was emailed to the NMOCD on January 14, 2009.

Thanks,  
Logan Anderson
