Latitude _____ Longitude _____

NATURE OF RELEASE

Type of Release – Produced Water	Volume of Release – +500 bbls	Volume Recovered – 480 bbls
Source of Release – Discharge Line	Date and Hour of Occurrence 10-22-08	Date and Hour of Discovery – 10-22-08 @ 11:00 am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Sherry Bohnam – NMOCD Jim Amos – BLM	
By Whom? – Kelton Beard - Oxy	Date and Hour – Same as above	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* Victalic clamp on the water pump discharge line broke, filling the battery with water. Spill was contained within the berms. All fluid was picked up with a vacuum truck. The battery will be delineated using field analysis. Confirmation samples will be taken to the lab. The groundwater in the surrounding area is > 98' using a borehole drilled at the nearby Roaring Springs 13 Fed #4 Battery. The borehole was in Section 13 T21S R23E. The following are the recommended action levels for the site : Chloride – 500 ppm, TPH – 1,000 ppm, BTEX – 100 ppm(field vapor analysis).

Describe Area Affected and Cleanup Action Taken.* As per the approved plan the impacted soil at SB1 and SB2 was to excavated 1' bgs and SB3 was 5' bgs. Very hard rock was encountered at 3' 6" at SB3 and a confirmation sample was taken. As per the conversation with Mike Bratcher the soil below 3' 6" at SB3 would be left in place due to the hard rock. 150 cubic yards of impacted soil was removed from the pile and the remaining impacted soil was blended with clean caliche to below the RAL's and backfilled into the excavation. The berms around the battery were rebuilt.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
