MAY 13 2015

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Driver was loading off of the produced water tank and did not realize the back valve on the trailer was opened. The hauler shut off the pump and the open valve and called a supervisor.

RECEIVED

Describe Area Affected and Cleanup Action Taken.*
Fuson did one call and did cleanup work. They back dragged area where spray occurred on location. Roustabout rerouted line to prevent upward spray.

Analytical Data Required (HMP)

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: RE: C-141 Dickens 29 Fed 3 Battery Final Report

Ms. Barron,

The OCD still has not received the initial C-141 for this incident. I will now alter the Final C-141 that you originally sent, and accept it as an INITIAL ONLY. A final C-141 will not be accepted without the proper closure documentation.

Heather Patterson

Subject: RE: C-141 Dickens 29 Fed 3 Battery Final Report

Ms. Barron,

Please submit an initial C-141 for this release, I do not see that the OCD ever got one. Also, a final C-141 should be accompanied with a closure report, complete with a site map, site ranking, and analytical data showing that remedial efforts were effective.

Thank you,

Heather Patterson
