Black Jack Fed 2 Battery 5.10.15 at 6:45 am - The sight glass on production separator failed causing produced fluid to escape on to ground. Lease operator closed the 1/2 inch valve from vessel to sight glass fluid cock on the top and bottom, this stopped the loss of fluid.

**Describe Area Affected and Cleanup Action Taken.\***

14 BBL of oil and 1 BBL of produced water spilled on pad. A light mist went into the pasture on the east side of pad 10' X 15" area. 10 BBL of oil was recovered. An environmental group will be called out for cleanup.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Good Morning Mike,

Upon reviewing the NMOCD website for the RP # associated for the spill related to this site; I see that the C-141 (attached) has not been filed. Can you please assign an RP # and advise me?

I will send you a remediation plan.

Thanks so much!

*Best Regards*

*Rebecca Pons*
