NATURE OF RELEASE

Type of Release	SWEET CRUDE		Volume of Release	10 BARRELS	Volume Recovered	1.75 BARRELS
Source of Release	HUMAN ERROR / PROCEDUR	Date and Hour of Occurrence:	6/2/15 null	Date and Hour of Discovery:	Jun 2, 2015 4:20 PM	
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required		If YES, To Whom?	NM-OCD-Heather Patterson		
By Whom?	REBECCA MOORE		Date and Hour	6/3/15 10:00 AM		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*
No Watercourse was impacted

Describe Cause of Problem and Remedial Action Taken.

A valve failed on a transfer pump causing a release of approximately 10 Bbls. of crude oil. A truck driver was on site and immediately shut down the pump. A vacuum truck was utilized to recover standing fluids, and a backhoe was mobilized to scrape up the saturated soil to a depth of approximately 0.5 feet below ground surface (bgs). Talon/LPE mobilized personnel to conduct a site assessment and perform soil sampling within the impacted area.

Describe Area Affected and Cleanup Action Taken.

Excavation activities continued in order to mitigate the extent of the release. Using initial laboratory results, the impacted area was excavated to a depth of 1 foot bgs. Once the excavation was complete, confirmation samples were taken to insure that all of the impacted material was removed. Laboratory results and a site map of sample location are attached. Upon receipt of laboratory results from the confirmation sampling event, the excavation was backfilled with caliche and contoured to match the surrounding location.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
