**NM OIL CONSERVATION**  
ARTESIA DISTRICT  
JUL 16 2015  
RECEIVED

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* On 7-14-15 driving daily route noticed water running down a ravine by lease road. Walked out to where the produce water was coming from it was a 4" transit line. Which is the main water transfer line for the Turner b south battery over to Russell turner injection station.

Describe Area Affected and Cleanup Action Taken.\* Where the 4" transit line broke lays through a washout spot and due to rain water running through that washout spot caused the leak. Affected area is 4' wide by 400' long running southwest from the spot of the leak

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
