If a Watercourse was Impacted, Describe Fully.*

NM OIL CONSERVATION
ARTESIA DISTRICT

Describe Cause of Problem and Remedial Action Taken.*

Spill was due to corrosion on weld of the 4" load line.

JUL 17 2015

Describe Area Affected and Cleanup Action Taken.*

Spill was contained in lined liner; we will remove all contaminated gravel and replace with fresh.

RECEIVED

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

All,

I need to make a correction to this C-141.

Apparently after gauging the tank and looking at water haul tickets, it was realized that the total volume of water released was 160 bbls. We did only recover 20 bbls and this is a lined facility. When the dirt covering was removed from the liner two (2) rips were discovered. That would make total volume lost 140 bbls of produced water.

This is an active production facility. Please advise as to how you'd like us to move forward.

Christine Alderman
