Production was routed into a tank that was out of service due to a hole in the tank.

RECEIVED

Describe Area Affected and Cleanup Action Taken.*
All fluids were contained within the LINED berm. Impacted soils on top of the liner will be removed and replaced.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

All,

We had a release at the above named facility on 7/16/15. Production was turned into a tank which was out of service due to a hole in the tank. 12 bbls of oil was released into a LINED containment. We were able to recover 11 bbls, there was dirt on top of the liner which will be removed and disposed of.

A c-141 will follow.

Christine Alderman
