NATURE OF RELEASE

Type of Release : Condensate & Raw Natural Gas	Volume of Release : 15bbbls	Volume Recovered: 0 bbbls
Source of Release : Pipeline	Date and Hour of Occurrence: UNKNOWN	Date and Hour of Discovery: 12/5/2012 12:00 pm
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? NMOCD/ Mike Bratcher via email BLM / Jim Amos via email & Carl Chavez/ OCD via email	
By Whom? Jon Bebbington	Date and Hour : 12/5/2012 15:50 pm	
Was a Watercourse Reached? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse. -0- bbbls, dry arroyo	

If a Watercourse was Impacted, Describe Fully.*
Approximately 15 barrels of condensate flowed down a gradual slope and approximately another 2000-foot into a 10-foot deep dry arroyo and continued down slope.

Describe Cause of Problem and Remedial Action Taken.* A six-inch steel buried natural gas gathering pipeline was observed to have leaked due to a corroded section of pipe. The pipeline was shut-in and a sorbent material was used and a temporary berm was constructed to prevent further flow into the arroyo in the event of rain.

Describe Area Affected and Cleanup Action Taken.* Talon/LPE was also contacted for the correction of the release. The impacted area was excavated to a depth of 6-inches to 2-foot deep, analytical testing was completed and the impacted soil was transported to Lea Land, LLC an approved disposal facility. The excavation was backfilled with new soil and contoured to match the surrounding terrain. Final lab results are below RRAL's.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
