If a Watercourse was Impacted, Describe Fully.* *AUG 10 2015*

Describe Cause of Problem and Remedial Action Taken.* **RECEIVED**

Cause of leak: The tank battery was struck by lightning. Upon being struck, the battery caught fire and burned a hole in the corner of the containment. Fire department was immediately contacted and vacuum trucks arrived to clean the spill as soon as the location was deemed safe.

Describe Area Affected and Cleanup Action Taken.*

Affected area: The produced water leaked out of the SW corner of the containment behind location. Vacuum trucks recovered all of the standing water and any visually contaminated soil was taken to an approved NMOCD disposal site. Final remediation will be conducted in accordance with the NMOCD's Guidelines for Remediation of Spills, Leaks and Releases.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
