If a Watercourse was Impacted, Describe Fully.* N/A		
Describe Cause of Problem and Remedial Action Taken.* A 1/2" inch fitting on the discharge side of the east SWD pump failed. Pump shut down and fitting was repaired.		
Describe Area Affected and Cleanup Action Taken.* The leak affected approximately 3,058 square ft. area of caliche pad directly south of the SWD containment and surrounding containment on all sides. A vac truck recovered fluids from the zero perm containment as well as from the ground. The leak on the caliche is within an area previously lined with 20-mil plastic. The saturated surface soils were scraped up and removed to a NMOCD approved disposal facility.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
