Application for Exception to Rule 303-A
Downhole Commingling
GCU #331 Well
Unit E Section 29-T29N-R12W
Pinon Fruitland and West Kutz Pictured Cliffs Pools
San Juan County, New Mexico

Enclosed please find an administrative application form (C-107-A) and attachments for downhole commingling for the captioned well. Amoco is the only offset operator in both formations so no notice is being made to offset operators in this action. Notice is also being made to the BLM and the Aztec District Office of the NMOCD.

Interests are not common between the formations. By copy of this application by certified mail, return receipt requested, Amoco is notifying all affected interest owners in the formations captioned above. The Division Director may approve the proposed downhole commingling in the absence of a valid objection from any offset operator or any interest owner in those instances where ownership is not common in the zones to be commingled within 20 days after the receipt of the application if, in his opinion, waste will not result thereby, and correlative rights will not be violated.

Should there be questions concerning this matter, please contact me at (303) 830-5344.

Sincerely,

Pamela W. Staley

ALLOCATION METHOD

The allocation method that we plan to use for this well is to use the subtraction method. The Fruitland Sand has been on production since 1992 and provided herein is a future production profile of gas production from that formation. Production would be allocated using this schedule for the Fruitland Sand with the remaining production being attributed to the Pictured Cliffs Formation. The fruitland has historically recorded only dry gas as has the Pictured Cliffs so no forecast is being made for condensate.
