ADMINISTRATIVE APPLICATION COVERSHEET

THIS COVERSHEET IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS

Application Acronyms:

[NSP-Non-Standard Proration Unit] [NSL-Non-Standard Location]
[DD-Directional Drilling] [SD-Simultaneous Dedication]
[DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
[PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
[WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
[SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
[EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

[1] TYPE OF APPLICATION - Check Those Which Apply for [A]

[A] Location - Spacing Unit - Directional Drilling
☐ NSL ☐ NSP ☐ DD ☐ SD

Check One Only for [B] or [C]

[B] Commingling - Storage - Measurement
☒ DHC ☐ CTB ☐ PLC ☐ PC ☐ OLS ☐ OLM

[C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
☐ WFX ☐ PMX ☐ SWD ☐ IPI ☐ EOR ☐ PPR

[2] NOTIFICATION REQUIRED TO: - Check Those Which Apply, or ☒ Does Not Apply

- [A] ☐ Working, Royalty or Overriding Royalty Interest Owners
- [B] ☐ Offset Operators, Leaseholders or Surface Owner
- [C] ☐ Application is One Which Requires Published Legal Notice
- [D] ☐ Notification and/or Concurrent Approval by BLM or SLO
U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
- [E] ☐ For all of the above, Proof of Notification or Publication is Attached, and/or,
- [F] ☐ Waivers are Attached

[3] INFORMATION / DATA SUBMITTED IS COMPLETE - Statement of Understanding

I hereby certify that I, or personnel under my supervision, have read and complied with all applicable Rules and Regulations of the Oil Conservation Division. Further, I assert that the attached application for administrative approval is accurate and complete to the best of my knowledge and where applicable, verify that all interest (WI, RI, ORRI) is common. I further verify that all applicable API Numbers are included. I understand that any omission of data, information or notification is cause to have the application package returned with no action taken.

Hand Delivered

David Catanach
New Mexico Oil Conservation Division
2040 South Pacheco Street
Santa Fe, New Mexico 87505

Dear Mr. Catanach:

Enclosed are two administrative applications for downhole commingling, filed by Mallon Oil Company ("Mallon") on the following wells:

Jicarilla 434G Well No. 4
Unit J - S6 - T22N - R4W
Sandoval County, New Mexico

Jicarilla 435G Well No. 3
Unit D - S8 - T22N - R4W
Sandoval County, New Mexico

The Jicarilla 434G Well No. 4 is on Jicarilla Apache Tribal Contract No. 434, and the Jicarilla 435G Well No. 3 is on Jicarilla Apache Tribal Contract No. 435. Interest ownership in each lease is common, and thus notice of this application has not been given to interest owners in the proposed wells. The two leases collectively cover Sections 4-9 - T22N - R4W, and are operated by Mallon. As a result, Mallon is the only offset operator entitled to receive notice of these applications.

Attached to each application are (i) Attachment A, describing pools in the area, (ii) Attachment B, describing production allocation and the method used for allocation, (iii) Attachment C, which contains production and economic data, and (iv) a Form C-102 for each zone.

Mallon plans to fracture stimulate all zones in one day while completing the well, thus saving approximately \$60,00-80,000 over and above the cost of fracing each zone on a different date if each

zone is produced separately. All zones are marginal. In fact, no wells have been drilled in Township 22 North, Range 4 West, and the adjoining townships, during the 1990s. Fracing and producing all zones, together with improved completion methods, could lead to improved recoveries. Thus, drilling and commingling production from these two wells will provide additional data which could support the drilling of more wells in this area.

If you need any additional data on these applications, call me or Ray Jones at Mallon (303-293-2333, ext. 1450).

Very truly yours,

James Bruce

Attorney for Mallon Oil Company

APPLICATION FOR DOWNHOLE COMMINGLING

Operator Mallon Oil Company Address 999-18th Street, Suite 1700, Denver, CO 80202
Lease Jicarilla 434G No. 4 Well No. Unit J, Sec. 6-T22N-R4W Sandoval County
OGRID NO. 13925 Property Code 6248 API NO. 30-043-20941 Federal ☒ State ☐ (and/or) Fee ☐

The following facts are submitted in support of downhole commingling:	Upper Zone Fruitland	Intermediate Zones PC, Mesaverde, Gallup	Lower Zone Dakota
1. Pool Name and Pool Code	SEE ATTACHMENT A		
2. Top and Bottom of Pay Section (Perforations)	1725 - 1850	1850-1925(PC), 3365-4175(MV), 4175-6075(G)	6075 - 6385
3. Type of production (Oil or Gas)	Gas	Oil & Gas	Oil & Gas
4. Method of Production (Flowing or Artificial Lift)	Flowing	Flow	Pump
5. Bottomhole Pressure Oil Zones - Artificial Lift: Gas & Oil - Flowing: All Gas Zones: Estimated Current Measured Current Estimated Or Measured Original	a. (Current) Current pressures in all zones should be close to original. b. (Original) 590 est	a. b. 1260 est	a. b. 2050 est
6. Oil Gravity (° API) or Gas BTU Content	1187 BTU est	1200 BTU 38-46 API	1270 BTU 41-46 API
7. Producing or Shut-In?			
Production Marginal? (yes or no)	Yes	Yes	Yes
* If Shut-In, give date and oil/gas/water rates of last production Note: For new zones with no production history, applicant shall be required to attach production estimates and supporting data * If Producing, give date and oil/gas/water rates of recent test (within 60 days)	Date: Rates:	Date: Rates:	Date: Rates:
8. Fixed Percentage Allocation Formula - % for each zone	Oil: % Gas: %	SEE ATTACHMENT B Oil: % Gas: %	Oil: % Gas: %

9. If allocation formula is based upon something other than current or past production, or is based upon some other method, submit attachments with supporting data and/or explaining method and providing rate projections or other required data.
10. Are all working, overriding, and royalty interests identical in all commingled zones? ☒ Yes ☐ No
If not, have all working, overriding, and royalty interests been notified by certified mail? ☒ Yes ☐ No
Have all offset operators been given written notice of the proposed downhole commingling? ☒ Yes ☐ No
11. Will cross-flow occur? ☐ Yes ☒ No If yes, are fluids compatible, will the formations not be damaged, will any cross-flowed production be recovered, and will the allocation formula be reliable. ☐ Yes ☐ No (If No, attach explanation)
12. Are all produced fluids from all commingled zones compatible with each other? ☒ Yes ☐ No
13. Will the value of production be decreased by commingling? ☐ Yes ☒ No (If Yes, attach explanation)
14. If this well is on, or communitized with, state or federal lands, either the Commissioner of Public Lands or the United States Bureau of Land Management has been notified in writing of this application. ☒ Yes ☐ No
15. NMOCD Reference Cases for Rule 303(C) Exceptions: ORDER NO(S). _____
16. ATTACHMENTS:
* C-102 for each zone to be commingled showing its spacing unit and acreage dedication.
* Production curve for each zone for at least one year. (If not available, attach explanation.)
* For zones with no production history, estimated production rates and supporting data.
* Data to support allocation method or formula.
* Notification list of all offset operators.
* Notification list of working, overriding, and royalty interests for uncommon interest cases.
* Any additional statements, data, or documents required to support commingling.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

SIGNATURE Ray E. Jones TITLE Vice President - Engineering DATE 5/21/97

ATTACHMENT A

Pools (shallowest to deepest):

Basin-Fruitland Coal Gas Pool

Undesignated Ballard-Pictured Cliffs Gas Pool

Mesaverde (Wildcat)

Undesignated Otero-Sanostee (Oil) Pool

Undesignated South Lindrith Gallup-Dakota (Oil) Pool

ATTACHMENT B

Proposed Allocation of Production

	<u>Fruitland</u>	Pictured <u>Cliffs</u>	<u>Mesaverde</u>	<u>Gallup</u>	<u>Dakota</u>
Gas:	5%	72%	1%	17%	5%
Oil:	0%	0%	23%	72%	5%

This proposed allocation is based upon the following factors: (1) although there has been no production from the Fruitland in the immediate area, Mallon believes it may be productive of gas in marginal amounts, and it was arbitrarily assigned 5% of gas production until production data is obtained; (2) there has been no single-zone production from the Dakota in the immediate area, but several wells have been completed as Gallup-Dakota wells, and it is estimated that the Gallup zones contribute the bulk of production in these wells, which have produced both oil and gas. As a result, the Dakota has been assigned 5% of oil and gas production; and (3) the remaining zones have been assigned production based upon average recoveries from 49 wells in the immediate area (see Attachment C for recovery figures).

Production Performance

All zones are tight formations that must be stimulated to produce. Hydraulic fracturing is the most common method of stimulation and is planned for this well and these zones. All zones will therefore behave in a similar manner as dictated by a hydraulic fracture completion. The initial rates will be on a steep hyperbolic decline represented by a Arp's n value of 2.0. The production will become exponential in 2 to 4 years with exponential declines in the range of 5 to 20 percent per year expected.

As each zone will have similarly shaped production decline curve, the relative production produced from each zone will be reasonably consistent throughout the well life and a set production allocation percentage for each zone is appropriate. The final well allocation for each zone

The cumulative production values for 49 area wells were reviewed for relative zone performance and for economic evaluation of the proposed commingling. The results are as follows:

Fruitland:	There are no known Fruitland completions in the immediate area.
Pictured Cliffs:	Cumulative production for 29 PC completions has ranged from 1 to 519 MMCF gas and has averaged 181 MMCF gas with no oil.
Mesaverde:	Average cumulative production for 3 Mesaverde completions has been 8 MBBLS oil and 2 MMCF gas.
Gallup:	Average cumulative production for 20 Dakota-Mancos completions has been 25 MBBLS oil and 44 MMCF gas.
Dakota:	There are no known Dakota completions in the immediate area.

Economic Performance

Example economic evaluations were performed for the average production recoveries detailed. Cases were run for each individual zone, a three zone commingled case and a case with individual zone production and recompletion from zone to zone as each becomes uneconomic. The results are summarized below and clearly show that single zones or consecutive re-completions are not economically viable for the average production streams used. Initial commingling is necessary for these marginally productive zones.

Case	Net Oil (MBBLS)	Net Gas (MMCF)	INV (M\$)	CF (M\$)
PC Only	0	188	250	-125
Gallup	25	45	419	-192
Mesaverde	8	2	335	-285
Commingling	33	229	454	86
3 Zones	33	234	519	-119
