Bottom Hole Location
Section 31 T-18S R-32E
Lea County, New Mexico

Dear Mike:

Marbob Energy Corporation respectfully requests administrative approval for an unorthodox location of the LPC 31 Federal #1 well as referenced above. Attached is an OCD Form C-102 showing the proposed oil well spacing unit along with a map showing the adjoining spacing units. The well is unorthodox to the west boundary of the SW/4NE/4. The affected spacing unit is included in the same federal lease as the well location and the ownership is identical. A courtesy notice of this application has been sent to the BLM who as the royalty owner of all the proration units as well as the surface owner, and Lynx Petroleum who operates the N/2SE/4 and NE/4SW/4.

The location encountered some significant drilling problems possibly caused by a fault structure that caused the bottom hole location to deviate a fair distance from vertical. Long string casing was run and the well completed as a marginal producer in the Bone Springs formation. We would request your approval of this unorthodox location.

Thank you for your consideration of this. If you need to talk with me further please call me at 800-748-1550.
