NMOCD ARTESIA

If a Watercourse was Impacted. Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*
Cause:
OXY INDIAN BASIN GAS PLANT FLARED RESIDUE SALES GAS FOR 107 MINUTES DUE TO HIGH RESIDUE GAS PRESSURE. IBGP LOST INLET COMPRESSOR. COMPRESSORS AT SIB WERE PUT ONLINE WHICH CAUSED THE RESIDUE GAS PRESSURE TO CLIMB. THE RESIDUE PRESSURE CONTROL VALVE DIDN'T REACT FAST ENOUGH CAUSING BOTH RESIDUE COMPRESSORS TO SHUT DOWN AND SCV15106 TO OPEN TO FLARE TO PREVENT PLANT FROM OVER PRESSURING.
Remedial Action Taken:
OPERATIONS COULDN'T GET NORTH RESIDUE COMPRESSOR TO START. ELECTRICIAN FOUND A PROBLEM WITH A RELAY. PROBLEM WAS CORRECTED AND COMPRESSOR WAS BROUGHT ONLINE AND REDUCED SUCTION PRESSURE BELOW FLARE SETPOINT TO CLOSE FLARE VALVE.

Describe Area Affected and Cleanup Action Taken.*
N/A

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
