NATURE OF RELEASE

Type of Release	NA	Volume of Release	0	Volume Recovered	0
Source of Release		Date and Hour of Occurrence		Date and Hour of Discovery	
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Mike Bratcher/Shelly Tucker		
By Whom?	Christine Alderman	Date and Hour	07/29/2015 1:30pm		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Lightning hit a 500 bbl fiberglass produced water tank and dislodged it. The tank landed on its side, and no fire was evident, just black soot on the ground.

Describe Area Affected and Cleanup Action Taken.*
All fluids remained in the tank, and this is a plastic lined facility.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Would you please forward me a C-141 for this release?

The BLM approval/acceptance does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

All,

Last night we had the 300 bbl fiberglass produced water tank at the Midway battery get struck by lightning.

The tank had 132 bbls of PW in it and all fluids were contained within a Lined berm.

There was no fire, it just blew the tank up. There is a lightning protection system on this battery.

A C-141 will follow.
