RECEIVED

Describe Cause of Problem and Remedial Action Taken.\*

Internal corrosion on a 2" steel transfer line off the back of the skim tank caused 40 bbls of oil and 20 bbls of produced water to leak onto the ground. A vacuum truck recovered 50 bbls of fluids and the line was repaired or replaced.

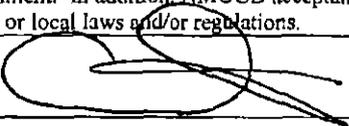

Describe Area Affected and Cleanup Action Taken.\*

The affected area is approximately 30'x 30' on location. Remediation was completed in accordance with the remediation plan approved by Mike Bratcher of NMOCD via email on 06/30/2014 and approved by Jennifer Van Curen of the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
