APPLICATION FOR POOL LEASE COMMINGLE

Proposal for Peridot Wells:

Devon Energy Production Company, LP is requesting approval for the Pool Lease Commingle for the following wells:

State Lease: VB-2153

Well Name	Location	API #	Pool 60600	OG	BTU
Peridot 13 State 1H	Sec. 12, NWSW, T19S, R29E	30-015-40782	Turkey Track; Bone Spring	39.9	1194.4
Peridot 13 State 2H	Sec. 12, NESW, T19S, R29E	30-015-40777	Turkey Track; Bone Spring	40.0	1230.6
Peridot 13 State 6H	Sec. 12, NESW, T19S, R29E	30-015-40780	Turkey Track; Bone Spring	39.9	1228.1

State Lease: VB-2141

Well Name	Location	API #	Pool 60660	OG	BTU
Peridot 13 State 3H	Sec. 12, SENE, T19S, R29E	30-015-40778	Turkey Track; Bone Spring	40.0	1303.5
Peridot 13 State 7H	Sec. 12, SENE, T19S, R29E	30-015-40781	Turkey Track; Bone Spring	39.8	1194.5

State Lease: VB-2153

Well Name	Location	API #	Pool 55510	OG	BTU
Peridot 13 State 5H	Sec. 12, NWSW, T19S, R29E	30-015-40779	Scanlon; Bone Spring	41.0	1157.7

Attached is a map which displays the federal leases and well locations in Section 12, T19S, R29E

The Royalty Rates are identical for all wells involved in the application.

Oil & Gas metering:

The central tank battery is located on Peridot 13 State 1H Battery in Sec. 12, NWSW, T19S, R29E in Eddy Co., NM. The production from each well will flow through a production header with isolation lines to route each wells production. From this point, one well will be on test and its production routed through the testing equipment. The production from each of these wells will be commingled, measured, and sold off-lease; using the Well Test Method. VRU will be allocated back to each well utilizing a percentage of each wells monthly oil production.

The Peridot 13 State 1H Central Tank Battery will have four oil tanks that these six wells will utilize and have a common **DCP CDP #15780-00** which is on location on the west side of the battery. Oil, gas and water volumes from each well producing to this battery will be determined by using a separator/heater treater at the proposed facility so that one well is always producing through the testing equipment. Production will be allocated on a daily basis based on the most recent individual well test of oil, gas, and water. Well tests for each well will be conducted at least once per month, for a minimum of 24 hours. Oil will be measured utilizing the tang gauge method, then will be sold through a common Smith Lact Meter **S/N 105257**.

The well which is on test production will flow to the two phase separator, which after separation, gas is routed to the gas test meter **#885-49-182**, then through check meter **#885-12-181**, and then to **DCP CDP #15780-00** on location. The oil and water production flows into the FWKO, after separation, the water is tested by a turbine meter, then combines with the produced water from the other wells and flows into one of the produced 500 bbl. water tanks. The oil then flows to the test heater treater, into the test tank, and is measured utilizing the tank gauge method.

Meters will be calibrated on a regular basis per API, NMOCD and BLM specifications. The OCD will be notified of any future changes in the facilities.

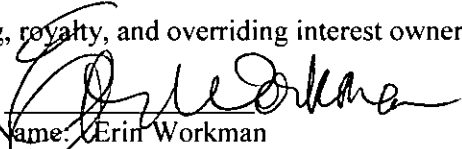

Process and Flow Descriptions:

The flow of produced fluids is shown in detail on the enclosed facility diagram, along with a description of each vessel and map which shows the lease boundaries, communization agreement boundaries, and location of wells, facility, and gas sales meter. The proposed commingling is appropriate based on OCD's regulations. The proposed commingling will maximize the ultimate recovery of oil and/or gas from the state leases and will reduce environmental impacts by minimizing surface disturbance and emissions. The proposed commingling will reduce operating expenses, as well as, not adversely affect federal royalty income, production accountability, or the distribution of royalty.

Devon Energy Production Company, LP understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. ROW has been obtained. The ROW numbers are as follows: RW – 33326, RW-33815, RW-33393, R-33205, & RW32911

Working, royalty, and overriding interest owners are identical, no further notification is necessary.

Mr. Ezeanyim:

Devon desires to surface commingle the wells listed below in the Turkey Track; Bone Spring (Pool Code: 60660) and the Scanlon; Bone Spring (Pool Code: 55510). Upon review of the title information and Devon's records, please be advised that all of the ownership is identical in these wells. Should you have any questions or need anything additional, please advise.
