The attached map shows the Federal lease and well locations in Section 33, T 23S - R 31E.

**Oil & Gas metering:**

Oil, gas and water volumes from each well producing to this battery will be determined by using a test separator and test gas meter at the facility so that one well is always producing through the testing equipment. Production will be allocated on a daily basis based on the most recent individual well test of oil, gas and water. Well tests for each well will be conducted at least once per month for a minimum of 24 hours each well. The oil production from the Sterling Silver wells and Triple S 33 Federal #1 listed above will be commingled, measured and sold on lease via LACT unit (#1157) into pipeline. Production will be allocated by well test method. Produced water will be measured through a turbine meter (meter #3455-47) and disposed at the Sundance SDS 11 #1 SWD.

The central tank battery is located at the Sterling Silver 33 #3 in Section 33, T23S, and R31E on Federal Lease NMNM-45236 in Eddy County, New Mexico. The gas sales meter is located off-lease at Enterprise Sand Dunes Compressor Station in Section 29, T23S, and R31E. The gas will be sold to Enterprise via meter number 68872. An Oxy check meter (#13155013) is located at the Sterling Silver 33 #3 facility. These meters will be calibrated on a regular basis per API, NMOCD and BLM specifications. The BLM and OCD will be notified of any future changes in the facility.

**Process and Flow Descriptions:**

Please see attached diagram for the Sterling Silver 33 #3 CTB. The flow of produced fluids and valve positions during production and sales phases is shown in the diagram.

The surface pool commingling of production is in the interest of conservation and waste and will result in the most effective economic means of producing the reserves in place from the affected wells. In addition, commingling will not result in reduced royalty or improper measurement of production. The proposed commingling will reduce operating expenses as well as reduce the surface facility footprint and overall emissions.

OXY USA WTP LP understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per NMOCD and BLM regulations.

The working interest, royalty interest and overriding royalty interest owners are different and have been notified of this application via certified mail.

Michael,

Yes, all interest owners have been notified. In my spreadsheet, part of Oxy USA Inc ownership was inadvertently left blank. Oxy owns the additional 4% WI and 2.9% RI.

Regards,

Kelley

Ms. Montgomery:

Have all of the working interest owners in the Sterling Silver Federal 1H been notified?  
Approximately 4% are not accounted for in your application.

Thank You
