I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCID rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCID marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCID acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

All,

Please find the attached initial C-141 for the release that occurred on the SWD riser future near the PLU CVX JV BS 008H (Intersection of Buck Jackson and Rock Dove Rd). I generated an initial notification email in the field the day of the release and sent via my iphone but due to poor service area I don't believe the message ever connected and sent. We plan to remove the saturated surface material and conduct a sampling event once the one call is active. If you have any questions or concerns please let me know.
