If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Fluid over ranged production vessels causing fluid to be released out the flare stack. An environmental response crew was dispatched to the location and began to scrape up the saturated soils; micro blaze was also applied to the vegetation.

Describe Area Affected and Cleanup Action Taken.*
The fluid released affected the pasture to the north/northwest of the flare area. An environmental response crew was dispatched to the location and began to scrape up the saturated soils near the flare; micro blaze was also applied to the vegetation within the spray area. The area will be sampled and discussed with the NMOCD and BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
