BOPCO EHS was notified of a release that occurred at the PLU 89 due to a gasket failure on the heater treater. The gasket failed on the top portion of the manway flange releasing oil to the earthen containment, well pad and small overspray to the east side of the battery. The heater was isolated until repairs can be made.

Describe Area Affected and Cleanup Action Taken.*

The gasket failed on the top portion of the manway flange releasing oil to the earthen containment, a vacuum truck was called to the location and was able to recover 25 barrels of oil from inside the containment area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
