Mike,

Back in 2009 we agreed that when this battery was dismantled CHK would removed an additional 3 feet of soil from within the old battery area, we have removed two foot when the original release occurred. The new battery is now in place and we are ready to finish the cleanup of the old battery area. If you still approve we will remove an additional three feet of soil and cap with liner and close the site. Attached is the original plan. If you have any question please let me know.

Thanks,
