If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* While making his rounds, the lease operator discovered that the 1/4" plug on a check valve located on the discharge of the produced water transfer pump had failed and was causing a spray of produced water to be released into the bermed portion of the battery.		
Describe Area Affected and Cleanup Action Taken.* Approximately 70'x25' bermed area. Vacuum truck driver picked up standing fluid and placed the fluid into the PW tank. The affected soil inside the battery will be blended with fresh soil.		

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
