Surface: 150 FSL & 330 FWL

We would like to add the Custer 16 State Com well to the existing CTB-717-A. Consolidating our battery facilities will extend the economic life for these wells and lessen surface disturbance. The metering methods will remain the same from the previous application which is the following: *The Stonewall 9 Fee 1H Battery will have the 1H, 5H, 6H and 25H producing to the battery. The 1H, 5H and 25H wells have common ownership and 6H has diverse ownership. The 6H will produce into a dedicated test separator and the 1H, 5H and 25H will be allocated through well tests and subtraction method through the two remaining separators. The Custer 16 State Com 1H will have its own dedicated separator. Commingling will not reduce the value of production.*

These wells will be producing from the Atoka; Glorieta - Yeso, 3250. Attached is a diagram of the battery facility, a map showing the well locations and the location of the CTB, admin checklist, and notice to all interest owners and publication.

Please contact me at 432-685-4332 should you have any questions.

Sincerely,
