Was a Watercourse Reached? ☐ Yes ☒ No	If YES, Volume Impacting the Watercourse.

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Internal corrosion of a 4-inch bypass line resulted in a release of crude oil, the free product was recovered with a vacuum truck, and the impacted soil was excavated, stockpiled, and remediated on-site. The excavated area was backfilled with the remediated stockpile.

Describe Area Affected and Cleanup Action Taken.*

The released crude resulted in a surface stain that measured approximately 40' x 30'. The impacted area was remediated per applicable BLM/NMOCD guidelines. Please see the attached Basin Environmental Consulting *Remediation Summary and Site Closure Request* for details of remedial activities conducted at the site.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
