Re: Application for Pool & Lease Commingling

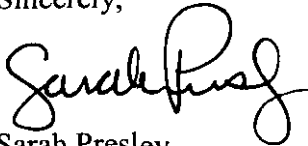

Ladies and Gentlemen:

BC Operating, Inc. is sending an application to the New Mexico Oil Conservation Division to Commingle gas production from the Smith Federal Com #2 to the Dark Canyon 19 Federal #1. A low pressure gas pipeline will be installed between the two wells and gas production will be commingled prior to a compressor that will boost produced gas pressure to sales line pressure. Custody transfer grade orifice meters will be installed at each well location in order to allocate sales volumes and revenue from each well to the common high pressure sales point located at the Dark Canyon 19 Federal #1 well location.

After initial notification, future wells that will produce from the pools and leases approved by this order may be added to this commingling authority by submittal of a Sundry Notice to the Engineering Bureau in Santa Fe.

Please contact me if you have any questions at 432-684-9696.

Sincerely,

Sarah Presley

Subject: RE: Smith Fed Com well No. 2 surface commingle application

They both will have the allocation meters installed so we can see what each well makes prior to going into the same sales line.

Subject: Smith Fed Com well No. 2 surface commingle application

Sarah:
How will production be measured between the two wells?
Are both wells measured with meters or will BC use subtraction method?

Thanks
Mike
