GW @ 25'

Describe Cause of Problem and Remedial Action Taken.\*

At the Uncle Sam 13 Fed 1 battery, a nipple on a water dump developed a leak, resulting in a spill of 50bbls of produced water and 5bbl spill of oil.

Describe Area Affected and Cleanup Action Taken.\*

It was discovered that there was a corrosion spot on the nipple, were the leak developed. All fluid was contained within the heater treater berm. A vacuum truck was able to recover 5 barrels of oil and 10 barrels of produced water. Talon will complete clean-up plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
