Devon 6 Fee #2H	Oil	61	44	452	1250	252	30-015-42931	H-6-25S-28E

The Benelli CTB is located at the Oxy Benelli 1 well pad in Section 8 T25S R28E. Maps showing lease information as well as flowline routing are attached.

**Metering:**

The Devon 6 Fee # 2H and Devon 8 Fee #1H-4H have identical ownership and will be produced through one production separator and metered through an oil turbine meter (S/N 65569) and water meters. Allocation will be done via well test through the test separator with gas (S/N 14926C), oil (S/N 55949) and water meters. Both separators are located off-lease at the Benelli CTB.

The Oxy Benelli 1 is a gas well and will have a dedicated separator, located at the Benelli CTB, and metering of gas (S/N 20063550), oil (S/N 384326) and water.

Oil production will be commingled, after first phase separation, and sent to a heater treater for further separation. Oil will then be sent to common storage at the Benelli CTB, before being sold using a LACT unit (S/N 14410570).

After separation and measurement, gas streams will be combined and sent to Oxy check meter S/N#149268. Gas will then be sold to Crestwood via the sales meter (S/N WL1-0028) located at 32.149400°, -104.117000°.

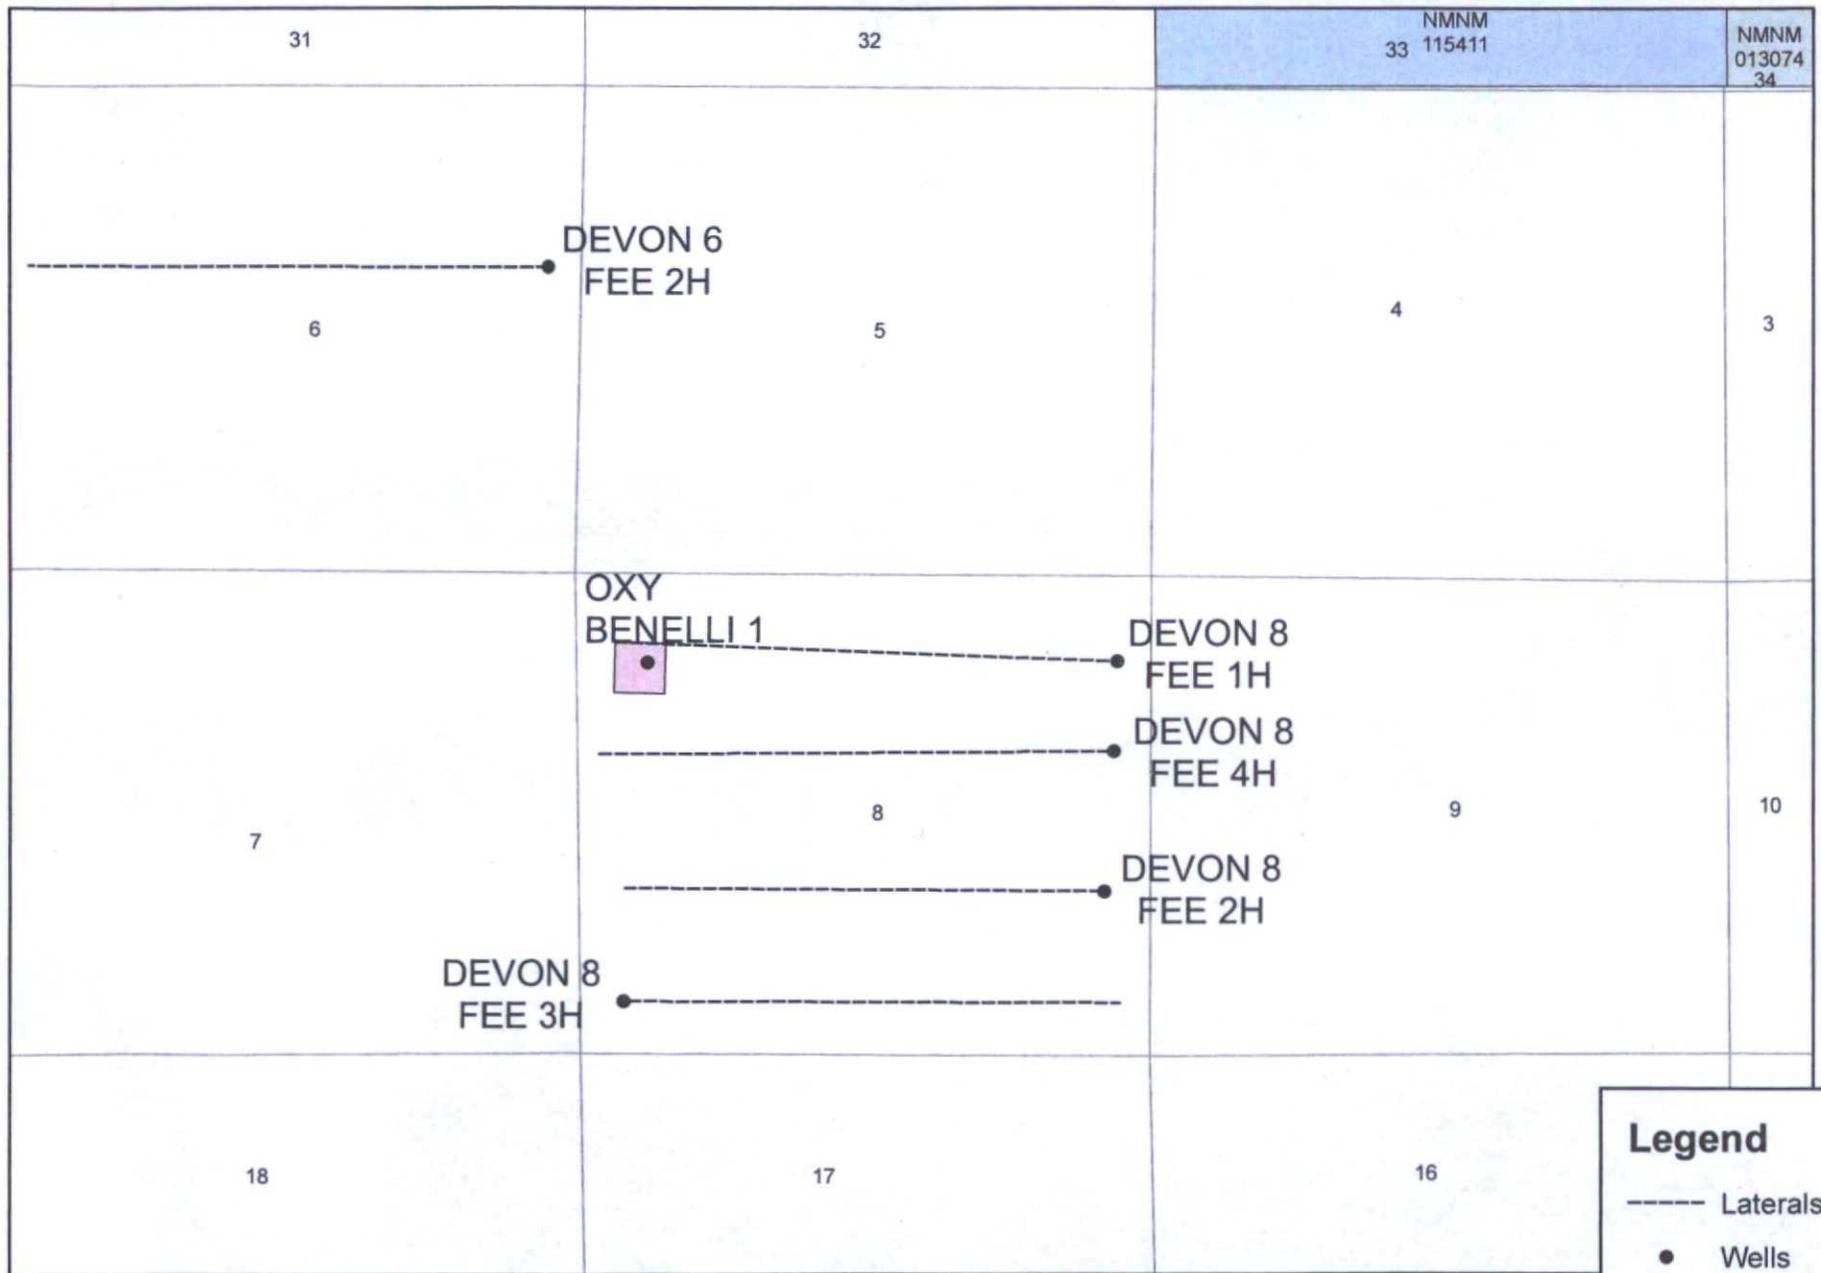

Water will be measured, sent to storage and then trucked from the lease.

The flow of production is shown in detail on the enclosed facility diagram.

The commingling of production is in the interest of conservation and will result in the most effective economic means of producing the reserves in place. The commingling proposal will reduce operating expenses as well as the surface facility footprint.

Occidental Permian LTD understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.
